Fishing and Hunting Expeditions  
P.O.Box 486  
Haines, Alaska 99827**

January 10, 2000

Dear Sir or Madam:

I am pleased to offer this recommendation on behalf of Bethany Thompson, Alaska Computer Specialists. I have enlisted the services of Bethany on a number of projects related to my sport charter business, "Alaska Beyond Boundaries Fishing and Hunting Expeditions".

Bethany has produced business cards, brochures and flyers for the promotion of my business based in Cordova, Alaska and serving Prince William Sound. At very economical rates, she has used her artistic talents, intuition, and computer proficiency to produce effective advertising products, which were crucial in presenting my charter business during the 1999 season in the Cordova area.

In addition, Bethany has redesigned and revitalized my web page, [www.akbeyondboundaries.com](http://www.akbeyondboundaries.com). She has demonstrated a grasp of professional and artistic approaches to making a sport fishing and hunting web page come to life in regards to color, attractiveness, and exciting script, which I feel has directly resulted in positive commitments in regards to reservations following email and phone responses to my new web page.

Also, Bethany has edited and finalized video footage, which I took during the season. She has applied music and editing techniques to my raw footage, at her total discretion, to produce a promotional video of my charter service which is not only pleasing to me, but has generated excited responses from my preferred customers from across the country.

I would be most happy to supply you with further details and specifics as to why I highly recommend the services of Bethany Thompson in promoting your business on the internet, on business cards, and on artistically attractive brochures. Please contact me by email: [staska@akbeyondboundaries.com](mailto:staska@akbeyondboundaries.com).

Sincerely Yours,

Ray Staska
